

KAUSHIK RAWAL

Bengaluru, India 560064 | +917892473384 | kaushik.rawalwork@gmail.com

PROFESSIONAL SUMMARY

MCA student at BMSIT with strong fundamentals in system design, Linux-based environments, and cloud platforms. Hands-on experience deploying and maintaining production applications, working with databases, containers, and APIs. Comfortable with deployment and monitoring of backend services, and actively developing proficiency in scripting, platform dependability, and systems engineering.

SKILLS

- Java
- Linux (WSL, Ubuntu)
- Javascript (Scripting)
- Cloud fundamentals
- Databases (SQL and MongoDB)
- System thinking and problem solving
- Docker (Basics)
- Version Control
- WordPress (Elementor pro and WpBakery)
- Basics of DNS, SSL, Hosting platforms

PROFESSIONAL EXPERIENCE

Web Developer Intern | Bizniti Digital | United States (Remote)

Sept 2024 - Feb 2025

- Developed and deployed responsive client websites using WordPress, Elementor Pro, and WPBakery.
- Configured hosting environments (Bluehost, GoDaddy), including DNS, SSL, and migration.
- Integrated APIs (Google Analytics, Brevo) and optimized system performance for better scalability.
- Troubleshoot server-side issues, database errors, and cloud hosting challenges, improving uptime and reliability.

EDUCATION

Master of Computer Applications

BMS Institute of Technology And Management
CGPA - 8.2

Dec 2024 - Present

Bachelor of Computer Applications

Nagarjuna Degree College
CGPA - 8.62

Oct 2021 - Aug 2024

PROJECTS

- **PeerLink - College project** - A peer-learning web app with ML-based user matching.
 - Built with MERN stack fundamentals, integrated cosine similarity for recommendation.
 - Deployed via Docker and explored cloud hosting options for scalability.
- **EcoPrompt - College Project** - Token optimizer for LLM models
 - Reduced tokens per prompt using the Flan-T5 model
 - Increased context window by lowering token size
- **Bixpli - Client's Website Creation During Internship - www.bixpli.com**
 - Created a professional WordPress website utilizing Elementor Pro, hosted on Bluehost with a GoDaddy domain, and optimized for performance and security.
 - Integrated interactive forms with Brevo and implemented the Chevron Process.
 - Addressed critical migration issues, such as hardcoded URLs and broken links, to ensure smooth website operation.
 - Enhanced search visibility by implementing Yoast SEO.
